

10' Rain **GUTTER** ATTACHMENT INSTRUCTIONS

The 10' Rain Gutter attaches to most 10' E-Z UP® Instant Shelter® sides.

- A** Position two E-Z UP® Instant Shelters® next to each other with approximately five inches of space between them. For best results use E-Z UP® Shelter Connector Brackets to firmly connect the shelters.

- B** Starting at one end of the Rain Gutter, attach the first truss clip to the top truss next to the chosen shelter leg.
- C** Attach the hook and loop fastener to each shelter leg and continue to attach the remaining truss clips to the shelter side trusses.
- D** Attach the remaining hook and loop fasteners to each shelter leg.
- E** Repeat steps B through D to attach your 10' Rain Gutter to the other E-Z UP® Instant Shelter®.

NOTE: When taking down your E-Z UP® shelter product, be sure to remove the 10' Rain Gutter before closing the shelter. We also recommend that all accessories be removed should heavy winds or extreme rain threaten.

ENJOY YOUR NEW 10' RAIN GUTTER
