

INSTRUCTIONS FOR INNER TOP LINER ACCESSORY

Completely set up your Bungalow® Pavilion in the area that you intend to shade according to the owner's manual instructions.

Step 1. (1a) Locate the center grommet hole of the inner liner. From the underside of the liner, slide the grommet hole over the attachment screw.

(1b) Screw and thread into the peak hub of the frame. Do not over-tighten the attachment screw.

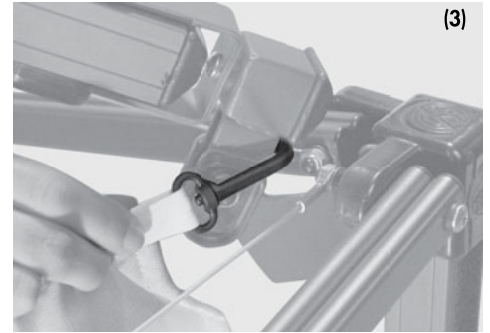

Note: When finished, the inner liner should hang freely from the peak hub. At this point, the sides of the inner top liner, that contain the hook and loop straps along the seam, should be facing out.

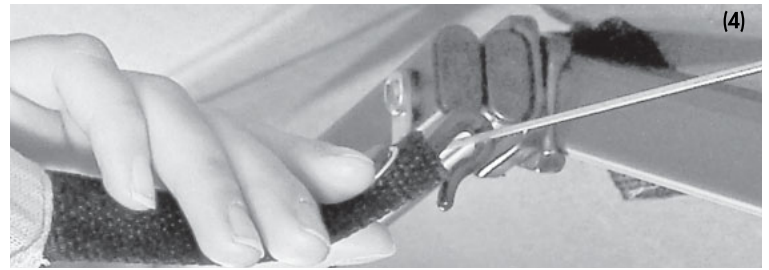

Step 2. Locate the hook and loop straps along each seam. Attach one hook and loop strap to the peak arm. Repeat this step for each peak arm.

Attach the hooks to the corner bracket. Repeat this step for each corner.

Connect each valance side of the inner top liner by hooking it over the cable. Repeat for all sides.

Prior to Installation

Completed Installation

Fabric Care:

- The fabric inner top liner clean-up is a breeze. Spot wash by sponging briskly with a soapy solution of natural soap in lukewarm water. Rinse thoroughly with clean water to remove soap and air dry. For stubborn stains, use a fabric spot remover. Follow directions on the container. Rinse thoroughly with clean water and air dry completely before storing.

Important Information:

- Always stake or weight down your Bungalow® Pavilion. Do not use in any potentially windy or rainy weather. Wind, rain and snow can damage the Bungalow® Pavilion and may also result in injury to you or others. Therefore, do not rely on shelter for protection in heavy or prolonged weather storms. Do not leave your Bungalow® Pavilion unattended.
- Do not use shelter in a lightning storm.
- The Bungalow® Pavilion is designed as a seasonal pavilion.
- Keep all flame and heat sources away from the fabric top. Do not build fires within the pavilion enclosure.
