

INSTRUCTIONS FOR INSECT SCREEN ACCESSORY

Completely set up your Bungalow® Pavilion in the area that you intend to shade according to the owner's manual instructions.

Step 1. With the fabric corners still folded back, hang the insect screen walls on the outer side of the trusses. The insect screen walls will hang between the fabric valance and the other truss.

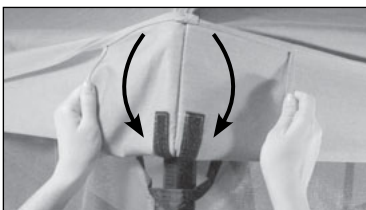

Step 2. (2a) Align the bottom of the fabric wall "V" with the frame leg to ensure the walls are centered. (2b) Slip the hook over the stainless steel cables.

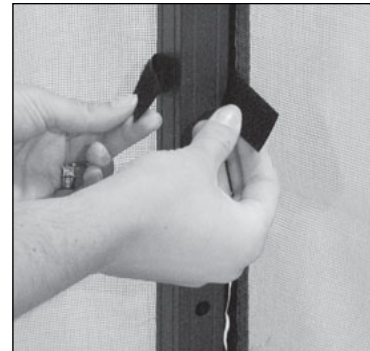

Note: Hang sidewall or corner curtain according to instructions.

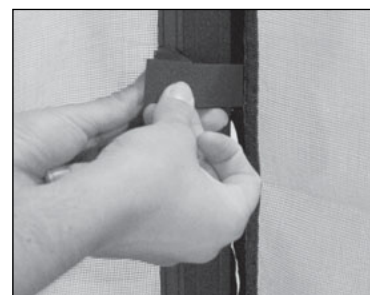

Step 3. Pull the fabric corner down over the leg and match the quick attachment strips to the frame for a secure fit.

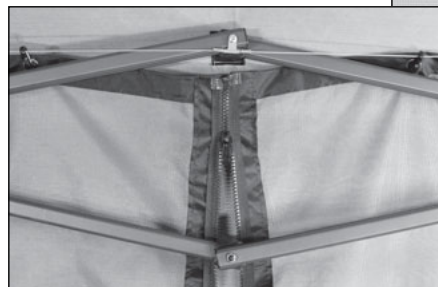

Step 4. From the inside of the Bungalow Pavilion, wrap the quick attachment straps around the leg and secure. These can be found just below the slider, at the midpoint of the screen wall and at the bottom of the screen wall.

Key Tip: If also installing a fabric sidewall, it should be placed on the outside of the screen. The screen includes indexing slits which allow the quick attachment straps from the curtain wall to slide through and also attach to the frame.

Step 5. Ensure that all screen walls zip together at the same time before installing anchoring devices. Repeat the steps for all legs.

Fabric Care:

- The insect screen fabric can be cleaned with mild soap (not detergent) and water. Let the fabric dry completely before storing.

Important Information:

- Always stake or weight down your Bungalow® Pavilion. Do not use in any potentially windy or rainy weather. Wind, rain and snow can damage the Bungalow® Pavilion and may also result in injury to you or others. Therefore, do not rely on the pavilion for protection in heavy or prolonged weather storms. Do not leave your Bungalow® Pavilion unattended.
- Do not use the pavilion in a lightning storm.
- The Bungalow® Pavilion is designed as a seasonal shelter.
- Ensure that all sidewalls zip together at the same time before installing anchoring devices.
- Keep all flame and heat sources away from the fabric top. Do not build fires within the pavilion enclosure.
